

Future Sustainable Healthcare SIG events

We'd love your input! What should we get together to discuss and learn in 2024?

Which of the suggested events below would you be most interested to take part in?

If you wrote 'other', please share your thoughts and ideas below

productive ways to talk with people about climate and sustainability - promoting action rather than despair

An exploration of what innovation means in the context of Net Zero and also how we look to change society

.

help with carbon footprinting as part of a big acute trust - how feasible is this in a single ward / department? or best just to get on with making changes?

A look at what Innovation means in context of Net Zero

de-prescribing / pharmacy / end-to-end pharmaceutical impact (from production to disposal)

What do you believe it is (also) important to discuss when it comes to environmentally sustainable healthcare?
